

ADDENDUM No. 1 – (June 7, 2019)

ADDENDUM TO: Microlite Control System Replacement, RJS
BID NUMBER: Bid #18-14
BID DUE DATE: **Thursday, June 13, 2019 not later than 10:00am**

.....

TO BIDDER: This addendum is an integral part of the Bid file under consideration by you as a bidder in connection with the subject matter identified above. For the purpose of clarification, the following additions, changes, modifications and replacements noted below have been made to the Bid and have been made to the Bid file which bears the above title.

Bids submitted shall conform to these additions and modifications noted herein and including all issued addendums.

CLARIFICATIONS

Clarification to Duplicate names on panel list: **See attached panel pages.**

Clarification to panel material: **Panel Enclosures are required be a Heavy-duty Fiberglass or Metal material that meet or exceeds NEMA 3R rating.**

Clarification to the request to review the data base: **Reviews may be conducted prior to the bid opening date by appointment, only.**

QUESTIONS AND TSA REPOSES

- 1) On the Microlite Panel List, Panel CLA1 is listed in both position 6 and 8 on the spreadsheet. Is there a second panel that is being missed? I did not find any additional panels in the panel load schedules. **There is not a second Panel CLA1, it was a typo. Please see updated Microlite Panel List.**
- 2) Which room is Panel CLA1 actually in? Shows it is in Room 04.07.03 and 4.40.03. **Room 4.40.03**
- 3) On the Microlite Panel List, Panel USLA1 is listed in both position 10 and 12 on the spreadsheet. Is there a second panel that is being missed? I did not find any additional panels in the panel load

schedules. **There is not a second Panel USLA1, it was a typo. Please see updated Microlite Panel List.**

- 4) Which room is Panel USLA1 actually in? Shows it is in Room 04.40.03 and 06.35.02. **04.40.03 on the third landing.**
- 5) Just to confirm, you sent us Panel Load Schedules in the RFP for a total of sixty (60) relay panels, but the Microlite Panel List has a total of sixty-two (62) panels. See items 1 and 3. Just want a confirmation. **There is a total of sixty (60) relay panels. Please see updated Microlite Panel List.**
- 6) In 14 of the Microlite panels you have "Emergency Circuits". I have not found any reference to any special control for these controllable loads in the RFP. Currently, the relays will stay in whatever state they were last in upon a power failure. Do you want a return to close function for these emergency lighting loads, if power fails to the processor of the panel? This will add cost, but I want to be sure of your desired function. **No, they shall maintain a state of the last reliable command upon a power failure.**
- 7) Can we use the wireway tray on the service level for running a Category 5e or 6 control cable between the different quads of the building for the lighting control system? **No, All control cable and wiring shall be in conduit. Existing Microlite control conduits may be utilized.**
- 8) If the answer to question 7 is NO, then may we temporarily use this wireway until the entire system has been converted over to the new lighting control system and then run a permanent cable in the conduit that handles the Microlite System? This will allow the 2 control systems to run at the same time. **Yes, as discussed in the pre-bid conference the Authority understands that we will be controlling the lights from the existing system and the new system simultaneously.**
- 9) Do you want the NEMA 4 Enclosures for the Light Towers in a specific color? Default color is black, but color can be different for an additional charge. **Please refer to specifications as NEMA 3 is required however NEMA 4 would be accepted. Gray enclosures are acceptable.**
- 10) Microlite made two (2) specific sizes of Microlite 1000 Relay Panels. They made a panel capable of 48 relays (1-24 on the left and 25-48 on the right) and 24 relays (1-12 on the left and 13-24 on the right). Your panel load schedules do not give us a clear understanding on which panels are 24 or 48 relay panels. Obviously, if the panel has a relay above 24, then we know that it is a 48-relay panel, but if there are less than 24 relays, we are not sure. Could you please confirm each panel? This will save money. **All existing enclosures are the Microlite 48 relay series. All of the current Microlite Panel schedules have been updated. Provide relays for all inputs listed.**
- 11) Currently, the system has one (1) Windows 10 Pro Server Computer in the RFP. Are there any other computers that you want us to provide in the bid? **No**

FOLLOWUP FROM PRE-BID MEETING

- 12) As discussed at the Pre-Bid Meeting, you are abandoning ALL of the override switches in the electrical rooms. Please confirm in writing. **Correct, all override switches and associated conduit will be removed by the TSA.**
- 13) As discussed at the Pre-Bid Meeting, all panels are controllable relays and NOT controllable breakers. Please confirm in writing. **Correct.**

14) As discussed at the Pre-Bid Meeting, you want approximately 8-10 ILC Insite Graphic Screens. Please confirm in writing. **This will depend on the installing contractor, the expectations as discussed in the pre-bid conference will be to have at a minimum all levels with areas shown graphically. There are 7 levels within the stadium, the outside perimeter footprint of the stadium and the schedule page which are the expectations to be viewed graphically.**

- 1. What ATT services are at the stadium? **N/A**
 - A. Is there Wi-Fi? **Yes**
 - B. If not ATT who is providing? **N/A**
 - C. Who is proving connectivity? **N/A**
 - D. If not ATT who is providing? **N/A**
 - E. Do you have Dark fiber? **Yes, See the General notes page.**

Note: To qualify your proposal, of which this addendum becomes a part, this form must be completed and returned to this office with the proposal.
